

REACH and BPR Compliance Statement

AEM5700 Antimicrobial

23 March 2020

The European Union (EU) regulation on the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH, EC No. 1907/2006) entered into force on 1 Jun 2007, with the intent to improve the protection of human health and the environment from the risks that can be posed by chemicals.

One of the requirements under REACH is that all components be registered prior to introduction to the EU marketplace. This product contains both a biocide and non-biocidal substances. The biocidal active component in this product has been notified under the Biocides Products Regulations (BPR, EC No. 528/2012), and, as per Article 95 of the BPR, is considered to be in compliance with REACH. The non-biocidal components of this product have been registered with REACH under the appropriate tonnage bands.

Microban is therefore in compliance with the both BPR and REACH regulations as put forth by the European Union.

A handwritten signature in blue ink, appearing to read "Rebecca Campbell", is positioned above the printed name.
