

# LONG LASTING SURFACE PROTECTION

*PLACES OF WORSHIP*

***PROTECT Surface Protection Program  
with the AEGIS® Microbe Shield®***

**PROTECT**

# Products

*A proven process that provides enduring surface protection for up to 1 year.*

PROTECT Surface Protection Program cleans, disinfects and then treats the surfaces that touch our lives with the AEGIS Microbe Shield to provide enduring **protection for up to 1 year**.

## Step 1: Cleaning & Disinfection

The first step in the Surface Protection Program is to prepare the surface prior to AEGIS treatment. There are 3 different levels of *clean* that our programs can achieve based on your needs.

### Cleaning

Cleaning removes microbes, dirt, and impurities. This process does not kill microbes, but by removing them, it lowers their numbers.

### Sanitizing

Sanitizing reduces but does not eliminate the population of microorganisms on treated surfaces.

### Disinfecting

Disinfectants kill microbes reducing their populations by 99.9999%.

## Step 2: Antimicrobial Treatment

### Surface Protection for up to 1 Year

Globally registered, AEGIS is the world's most widely used antimicrobial surface treatment.

AEGIS forms a protective coating that molecularly bonds with products upon application and inhibits the growth of microbes on surfaces.

When applied to surfaces, AEGIS forms a colorless, odorless, positively charged polymer that attracts, then electrocutes, ruptures, and disintegrates a microbe's negatively charged cell membrane.

AEGIS has a history of safe use and durability, ensuring long-lasting antimicrobial efficacy.

*Effective for up to 1 year*

# Programs

*Designed to protect the surfaces where you live, work and play.*

Our programs are effective on all types of surfaces including glass, fabric, metal, carpeting and plastic.

## 1 High-touch

*Recommended Annually\**

Our most comprehensive infection control support program. Cleaning, disinfection and AEGIS treatment on all high-touch and high-traffic surfaces located throughout the church, the chapel, church offices and parish hall.

- Building access door handles, including emergency exit doors
- Accessibility access buttons
- Stairwells including door handles and handrails
- Elevator and lift buttons and handrails
- Pews, chairs, kneelers, alter rails, processional candles and cross
- Hard and soft cover liturgical books
- Parish Hall and kitchen surfaces
- Church office surfaces including door and cabinet handles, chairs, desks, computer keyboards and mice, printer/fax buttons, phones and cell phones
- Common washroom touch surface areas including toilet seat, handles, dryer buttons, taps, sinks and handrails
- Additional common area touchpoints including meeting rooms, furnishings, light switches and tabletops

## 2 High-traffic

*Recommended Annually\**

Refresh all high-traffic surfaces that are part of the church's main artery and worship spaces. Cleaning, disinfection and AEGIS treatment typically includes the following surfaces:

Front door handles, handrails, pews, worship books, sacristy surfaces, parish hall surfaces, washroom high-touch surfaces and countertops.

## 3 Common Areas and Community Spaces

*Recommended Every 2 to 3 Years\**

This three-dimensional treatment regimen is recommended for areas where people meet in groups. Cleaning, disinfection and AEGIS treatment typically includes the following:

Floors, walls, ceilings, furniture and equipment in common areas and building amenities (such as the church, chapel, meeting rooms, and parish hall).

*\*Depending on your cleaning protocol. Harsh and abrasive cleaners can reduce the life of AEGIS.*

## Independent Test Results

Testing was conducted by independent labs, showing the sustained decrease in surface microbial contamination. Additional tests and case studies available upon request.

## Approvals & Care

AEGIS is not a disinfectant. AEGIS is registered with health authorities around the world including Health Canada and the US Environmental Protection Agency. Health Canada PCP 15133, US EPA 64881-1 64881-2

AEGIS and the AEGIS Microbe Shield are trademarks of Microban International.

### How to Care for AEGIS

- AEGIS bonds instantly and dries in 3 to 5 minutes on high-touch and high-traffic surfaces, 2 to 24 hours on treated fabrics such as carpets.
- AEGIS can be weakened or deactivated over time by highly caustic materials (pH 11+).
- Clean AEGIS treated surfaces with soap and water or non-caustic disinfectants.
- AEGIS can be removed by abrasion.
